PERSONAL PROFILE

Having worked extensively with backend and frontend applications coupled with my professional certifications. I have gained exposure, and established various technical skills relating to web developing, Object Oriented Programming and Database Management. A proactive, self-motivated individual, with strong learning enthusiasm. I relish the opportunity to work as part of a team, enjoying the challenge of taking on new roles and responsibilities in dynamic working environments. I am now looking to further my professional experience by seeking employment in a company that allows me to progress in the coding world.
